Xavier, the ever-young immortal cat that is behind world peace in our Vipton galaxy's region turns 5001 years today. Dubbed the handsomest cat alive; he is the only surviving cat from his extinct breed Turkish Angora once plentiful in number in then flourished planet earth from the neighboring galaxy. The infamous cat came to be the reason behind world peace ever since the day he was the cause behind a war not being waged where just when Planet Cyro warriors were about to throw in their laser tagged axes against Planet Covu soldiers' freeze blasts, Xavier calmly walked and stood in the middle and everyone stopped to pet him, and amends were made. He has contributed to keeping over 9000 wars from erupting and singlehandedly achieved world peace for the region. Today, in honor of his 5001th birthday, the galaxy's Council of All Affairs has declared every planet's official emblem to have a hologram of Xavier. All 12 planets; Cyro, Covu, Jobu, Kalib, Lopi, Ratishk, Nuvinchk, Sarooch, Bajink, Olympusiko, Itichikin and Wootland will commemorate in live simultaneous reveal of their emblems in a unionized broadcast above their towers. A grand tour opening will be held for the launch of All Lives Xavier museum on November 27th to showcase his story which will cover his early years, escape from clinical trials on planet earth, rescue mission by group of local humans, his transition into immortality, journey into outskirts to Vipton galaxy and current residential premises in his home planet Jobu where the museum is built. Special appearance will be organized for first three days of the opening, guests have been advised to sign up to the limited seating arena with tokens of treats for donations as an entry ticket. A three-day rally will also be organized to celebrate the occasion and events will be held in every planet for a week to mark the occasion. (Planet Soochi Reporter)

Woe is Cupid

National Story on High Profile Trial Case

Written by Maryam A. Rehman
Photography by Maryam's Clone

In the bizarre trial of Cupid here in Sarooch, a verdict has been called. Cupid has been sentenced to turn into stone for two thousand years as a punishment after being indicted of being the one behind starting the padlock movement on the main bridge of planet's gateway. The movement which had been a traditional practice in earth during modern ages; is banned in majority of Vipton galaxy due to no guarantee of said relationships lasting forever. It has been said Cupid started the movement falsely to encourage other love infected individuals to start a wave in the region, much of the controversy surrounds the matter as 'love' has been

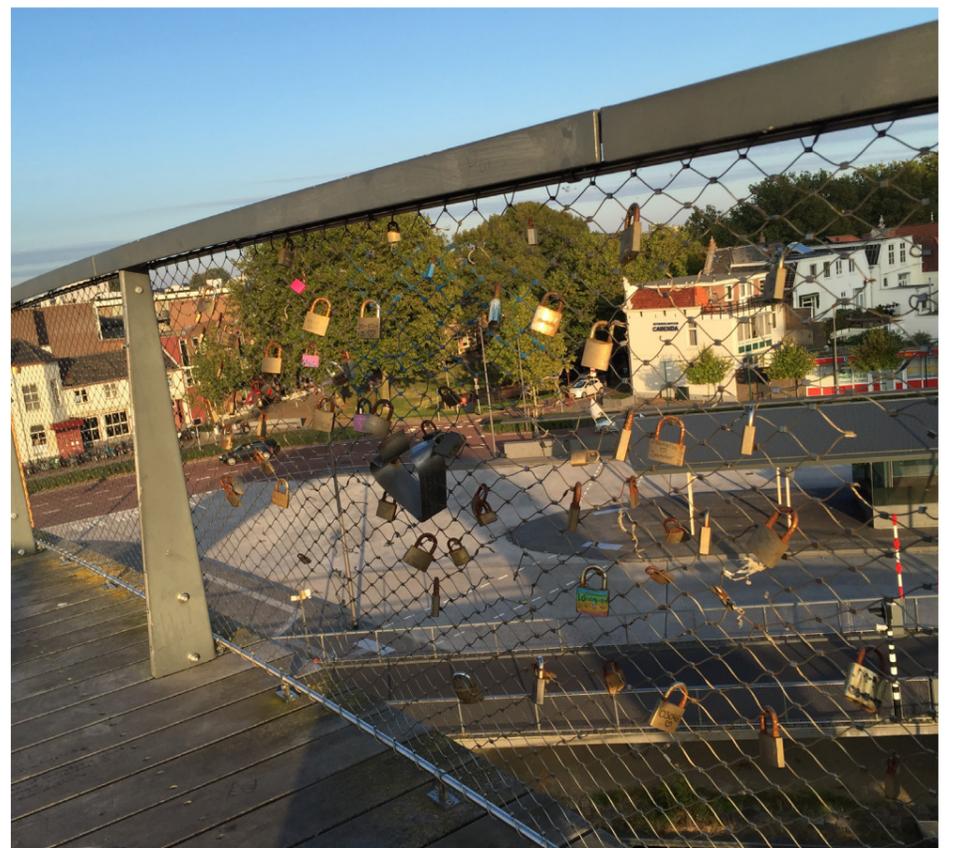

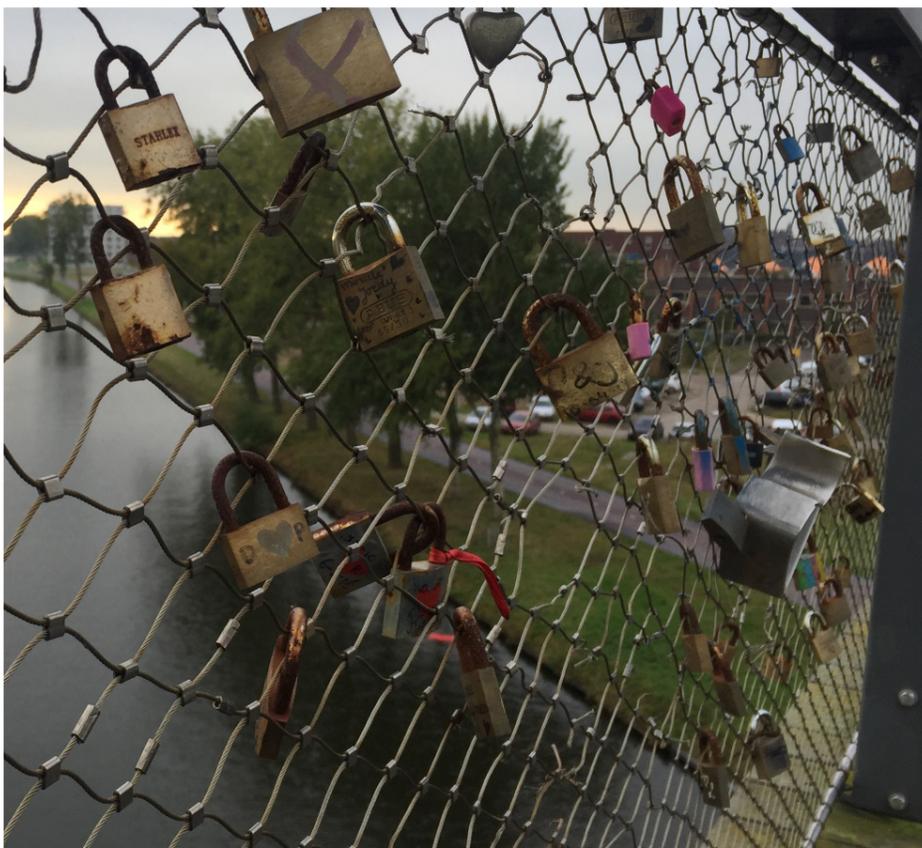

Cupid in stone.

classified as a disease in most planets enforcing limited public display of affection with the exception of Planet Ratishk where Cupid had sought exile. The trial came to an end after 250 years with an ongoing petition calling for Cupid's freedom and reversal of the classification on 'love'. The petition fell short of one signature just hours before the verdict being announced to the region. The defense team keeps arguing what led Cupid to rebel was simply not finding love himself and fear of love being eradicated due to his missing arrows' which were stolen by allegedly a bitter man. An appeal may be presented to the judiciary but, irrespective of any future results, Cupid will have to serve at least one thousand years in stone in the form of a live sculpture. There have been many protests held across all planets given that 'love' is in fact practiced openly

and to all extents, much of the trouble falls upon laws that cannot be changed unless another billion years pass before new ones can be put into place. The petition aims to change that completely altogether calling for immediate abolishment. Cupid's arrows remain missing. The arena will be open to the public throughout the week for six hours per day for viewing Cupid in 'sculpture'. (Soochi Special Correspondent)

Enormous Chess Championship

The Annual Championship Returns With Promising New Venue for Final Match Set to Astonish Crowd

Written by Maryam A. Rehman; Photography by Maryam's Clone

In sports, the official 44th Enormous Chess Championship begins next week on December 2nd; running strongly after its revival from planet earth where it never made it into the Olympics. 24 number of champions have been announced with returning reigning champ Coco Pop who is the youngest toddler to compete. He represents planet Olympusiko (named after its many successful competing athletes) along with unidentical twins; Vikki and Nikki, Solaris, Lex and from Planet Kalib Atlab and Polly, Planet Wootland with a singular champion in representation Max, Planet Lopi with Chip and Chase, Planet Itichikin with Biv, Walt, and Fischer, Planet Nuvinchk with Carter, Florence and Jeremiah and for a record breaking number of representations hosting Planet Cyro with eight competing champions Jo, Jojo, Joji, Joba, Lance, Alex, Ash and Lexa. Planet Cyro won the bid after producing a short clip of all eight champions presenting a choreographed match with the official anthem song for the championship which won over popular vote among the region's audience. The Championship is known for its fierce

competing rules of getting harder by each qualifying stage with the finalists expected to win within 0000.1 seconds in the last match. Certain bonus awards will be added this year for best checkmate celebratory move and personal sprays will be allowed to carry for post win decorative move by the competitors. The Championship will be aired across the region for free after Pay-Per-View was cancelled early on this year, marking this year's championship the first to be aired for free which is expected to make the championship even more popular among crowds. The final match will take place under the newly unveiled underwater arena with fish free to roam and special suits for those who do not have gills to assist them with breathing. The Championship duration will also be extended to two months. (All Things Sports Agency - Planet Olympusiko)
